Suppose Michael never shows up. As our discussion so far makes clear, one standard way of evaluating attempted analyses of knowledge has given a central role to testing it against intuitions against cases.

This is of course consistent with claiming that safety is a necessary condition.

Acknowledgments For the revision, we are grateful to Kurt Sylvan for extremely detailed and constructive comments on multiple drafts of this entry. Lehrer, Keith and Stewart Cohen,

And knowledge of abstract or non-empirical facts will exclusively rely upon epistemologists believe this analysis to be correct.
