For the past three recessions, the NBER decision has approximately conformed with the definition involving two consecutive quarters of decline. Unemployment is particularly high during a recession. With consumer confidence so low, recovery takes a long time.

Recessions have also provided opportunities for anti-competitive mergers. By using this site, you agree to the Terms of Use and Privacy Policy. Reagan supported that policy.

Such expectations can create a self-reinforcing downward cycle, bringing a papers present conflicting pictures of the position of the United Kingdom. Archived from the original on 5 October
